1. Organisation Overview

Name: Home of Hope organisation

Home of Hope is a registered non-profit organisation that provides care services for abused, abandoned and neglected children in our country, with a focus on those affected by Fetal Alcohol Spectrum Disorder (FASD), which is permanent brain damage caused by pre-natal exposure to alcohol.

Brief History:

Home of Hope was founded in August 2005 by Eleanor Brook, who inspired by her faith having adopted children of her own and having experienced life in a children's home herself, wanted to harness her experience to provide support for other children in need of care.

Mission and Vision:

Mission: it is to empower young people in Johannesburg by providing access to education, skills development, and mentorship programs that prepare them for future success.

Vision: To create a future where every young person, regardless of background, has the tools and opportunities to achieve their dreams and contribute positively to society. We provide personalized attention tailored to each child's needs, especially the ones that are fetal alcohol spectrum disorder (FASD).

Target Audience:

- Youth and small kids from disadvantaged communities
- Schools and educational institutions
- Potential donors, sponsors, and volunteers
- Corporate partners seeking community engagement initiatives

2. Website Goals and Objectives

The main objectives of the new website are to:

- Increase awareness about the foundation and its initiatives
- Attract donors, sponsors, and volunteers
- Create an accessible platform for event announcements and fundraising campaigns

Key Performance Indicators (KPIs):

- Growth in website traffic and page engagement
- Number of new donor and volunteer sign-ups via the website
- Donations and funds raised through online campaigns
- Social media integration and follower growth

3. Current Website Analysis

Currently, the Home of Hope organization does not have a dedicated website. Information is primarily shared through social media and printed materials. This limits the foundation's visibility and ability to attract a wider audience. A website would address this gap by providing a central hub for communication and engagement.

4. Proposed Website Features and Functionality

The proposed website will include the following key features:

- Homepage: Overview of the foundation, mission, and latest initiatives
- About Us: History, mission, vision, and team
- Programs: Detailed information about youth empowerment programs and mentorship opportunities
- Get Involved: Volunteer opportunities, sponsorship, and donation forms
- Events: Upcoming workshops, fundraisers, and community outreach programs
- Blog/Stories: Inspirational success stories, news, and updates
- Contact: Contact information, multiple locations, and enquiry form

5. Design and User Experience

Color Scheme: light-yellow, and white to reflect growth, hope, and energy

Layout and Design: Mobile-first responsive design to reach youth and donors on all devices

User Experience: Clear calls-to-action for volunteering and donating, easy navigation, and engaging visuals

6. Technical Requirements

- Hosting: Affordable and reliable hosting with strong security features
- Domain Name: HomeofHope.org.za or similar
- Programming Languages and Frameworks: HTML5, CSS3, JavaScript, and a CMS such as WordPress for easy content management

7. Timeline and Milestones

- Week 1: Project kickoff and requirements gathering
- Weeks 2-3: Design mockups and wireframes
- Weeks 4-6: Development of website
- Weeks 7-8: Content integration and testing
- Week 9: Launch and training for staff

8. Budget

- Development: R30,000 - R50,000
- Hosting and Maintenance: R3,000 - R5,000 per year
- Design and Content Creation: R8,000 - R12,000
